

Thank you for your interest in our Clinical Research Center. We have had the opportunity to conduct research in the following areas and plan to expand this list as our Center experiences further growth:

- Low back pain
- Shoulder pain
- Elbow and upper extremity pain
- Knee and hip pain
- Acute and chronic pain
- Opioid induced constipation (OIC)
- Diabetic neuropathy
- Muscle spasms
- Opioid analgesic medications
- Nonsteroidal anti-inflammatory medications (NSAIDs)
- Osteoarthritis
- Rheumatoid Arthritis

We currently have a variety of study opportunities for present and future patients. Typical requirements for participation in these trials include the criteria outlined below:

- Males / Females, ages 18-75
- No diagnosis of cancer within the past 5 years
- No diagnosis of rheumatoid arthritis or gout
- No history of seizure disorder or epilepsy
- No history of gastric bypass surgery
- No corticosteroid injections within past 3 months
- No HA injections within past 6 months
- Willingness to convert current pain medications to an investigational product

Please contact us if you are interested in learning more about these clinical research opportunities.
